to prevent stroke and heart disease

# WatchBP® O3

## Affordable ABPM and strictly guideline-based SBPM for accurate out-of-office blood pressure measurement.<sup>[1,2]</sup>

### Benefits:

Extremely affordable hybrid device for achieving accurate out-of-office blood pressure measurement as recommended by Leading Medical Society blood pressure measurement guidelines.<sup>[3,4,5,6]</sup>

Dual operation modes include 24-hour programmable ABPM or strictly guideline-based 7-day SBPM.

Fully-programmable measurement intervals for both day-time and night-time measurement periods.

microlife

Microlife® WatchBP® O3 (Out-Of-Office) is an extremely affordable, clinically validated hybrid blood pressure measurement device designed for advanced hypertension diagnosis and treatment assessment.

### Dual Operation Modes:

**24-Hour ABPM Mode** - Fully programmable 24-hour ambulatory blood pressure measurement for fast and accurate out-of-office blood pressure measurement.

**7-Day SBPM Mode** - Collect multi-day blood pressure data for use in initial hypertension assessment as well as on-going assessment of treatment.<sup>2</sup>

### Convenience:

**Programmable Measurement Intervals** - Custom programmable day-time and night-time measurements intervals of 15/20/30/60 minutes.

**Lightweight and Compact** - Lightweight construction and highly compact design translates into improved patient comfort.

**PC Connectivity** - Transmit BP measurement data to any PC via USB connectivity.

**WatchBP Analyzer™** simplifies blood pressure measurement data management by automating many aspects of data collection, tabulation, and analysis. With WatchBP Analyzer, in-office and out-of-office measurements can now be combined for more advanced hypertension diagnosis and treatment assessment.
